The amendment of 8/25/03 canceled claims 1-36, and added new claims 37-76, which are all claims in the application.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- 5 I. Claims 37-68, drawn to a method of immobilizing a
 biomolecule to a surface, classified in class 435, subclass
 174.
- II. Claims 69-72, drawn to a biomolecule/polymer conjugate,
 classified in class 530, subclass 402.
- 10 III. Claims 73-76, drawn to a method of immobilizing an
 oligonucleotide to a surface, classified in class 536,
 subclass 22.1.

The inventions are distinct, each from the other because of the following reasons:

- 15 Inventions I, III and II are related as process of making and
product made. The inventions are distinct if either or both of the
following can be shown: (1) that the process as claimed can be used to
make other and materially different product or (2) that the product as
claimed can be made by another and materially different process (MPEP
20 § 806.05(f)). In the instant case, the product can be made by a
materially different process. The conjugate of claims 69-72 can be
made without immobilizing to a surface as required by the methods of
claims of I and III, and without using a primer and amplifying to
produce a double stranded oligonucleotide/polymer complex as required
25 by the claims of III. Additionally, the conjugate of the claims of II

Art Unit: 1651

requires combinations of biomolecule and polymer not required by the methods of I and III.

The method of I and the method of III are distinct since the method of I can be carried out without using a primer and amplifying
5 to produce a double stranded oligonucleotide/polymer complex as required by the method of III, and the method of III requires four steps whereas the method of I requires only two steps.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their
10 different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

15 Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a
20 request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
